Speaker Information

Julia Moore, Chief Executive, GTMA Reshoring UK - The Engineering Marketplace

ReshoringUK is an initiative of GTMA to bring together a connected network of engineering trade associations to highlight to the manufacturing industry the strength of the engineering supply chain in the UK. This initiative recently secured funding from the HVMC to support the development of the Reshoring platform.

www.gtma.co.uk

John Kyffin Hughes, Business Engagement Manager, Aston Business School, Low Carbon SMEs The Challenges and Benefits of Energy Efficiency

The presentation will outline the business benefits of energy efficiency and demonstrate the benefits using real world case studies. Exploring the barriers to implementing energy efficiency projects and suggesting solutions for overcoming barriers. Diagnostic support and access to grants are available in the Midlands

www.smelowcarbon.co.uk

Annie Hunter, Consultant, GovGrant The Innovation Lifecycle: Leveraging your R&D with IPR

Successful R & D programmes will usually create Intellectual Property Rights (IPR), often in the form of patents. IP can be a company's most valuable asset, yet a recent survey revealed that only 4% of companies have an IP policy. When planning its innovation strategy it is essential a company considers how best to protect and exploit the IP it will create

www.govgrant.co.uk

Steve Bolt, Director, BCR Associates Data and Telecommunication Challenges for Manufacturers

The presentation will explore the challenges faced by Manufacturers with regards to Telecommunications infrastructure both within the factory and within its field force. It will explore the risks and the future landscape as we move towards BT Openreach plan to phase out landlines by 2025. The presentation will touch on Data, Cyber and GDPR issues that face all business.
